At page 8, line 8, please delete "2,2" and substitute --2.2-- therefor.

In the Claims:

1. (Twice Amended) A data processing system being comprised of:

[-] a display;

[-] a cursor control means connected to the display for displacement of a cursor represented on the display; and

[-] a user-interface means being coupled to the cursor control means for user manipulation of the cursor via the cursor control means, the user-interface means being operative to control the cursor control means by transmitting data effecting a relatively low speed to the cursor control means during a predetermined time interval, and by transmitting data effecting a relatively high speed to the cursor control means after the predetermined time interval has elapsed;

wherein the cursor control means is operative to displace the cursor at the [a] relatively low speed relative to the display during the [a] predetermined time interval upon activation of the user interface means and to displace the cursor at the [a] relatively high speed after the predetermined time interval has elapsed.

Please cancel claim 2.

8. (Twice Amended) A user-interface means suitable for use in the system of claim 1 [2].

REMARKS

In response to the Office Action mailed August 30, 1995, Applicants request reexamination and reconsideration of the application. Claims 1-11 are pending in the application. Claims 1 and 8 have been amended to more distinctly claim and particularly point out the subject matter of Applicants' invention. Claim 2 has been cancelled. Claims 1, 3-11 are presented herewith for consideration by the Examiner.

In the Office Action, the Examiner objected to the specification based on several informalities. In addition, claims 1-11 were rejected as being anticipated by Felsenstein, Mikan, and Kato. Applicants respectfully traverse the rejections. The amendments above clarify and
